In person: Residents of Iqaluit, Cambridge Bay, Rankin Inlet and Igloolik may drop off their applications to the local GN Finance office. In other communities, the Government Liaison Officer will be able to assist you.

What happens after I submit the application?

GN Finance officials will review your application carefully to verify you meet the criteria. They may contact you to seek additional information or to clarify your application.

Once Finance officials are satisfied that you meet the eligibility criteria, they will issue the payment. They will not issue a payment otherwise.

How will payments be made?

The GN will mail cheques directly to eligible recipients at the address they provide on the application form. If the eligible homeowner is a GN employee, we will issue the payment through the GN's payroll system where possible.

When can I expect the payment?

We will work hard to process your application in a timely manner. We expect it could take about **four weeks** from the date we receive a complete application to when the recipient receives their rebate. Because of planned closures, there may be an additional delay for applications submitted in December 2023.

Any errors or omissions with your application will delay payment. The number of applications we receive, the time it takes to mail cheques, and the GN pay schedule will also influence how long it takes to receive the payment.

What other rules apply?

A few other administrative rules may apply. For example:

- The GN will not issue more than one payment for each property.
- The GN will not issue more than one payment to a single individual, even if they own more than one residential property.

- Individuals who have moved away from Nunavut permanently may not be eligible for the Rebate.

Who administers the Rebate?

The Department of Finance administers the Rebate, defines operational requirements, enforces rules, and makes all decisions about an individual's eligibility.

Decisions by Finance management related to an individual's eligibility, application and other day-to-day operations are final.
