Public Health Advisory

Reminder: Boil Water Advisory – Rankin Inlet

The Department of Health reminds all Rankin Inlet residents to boil their water before consumption until further notice. This is a precautionary measure due to high turbidity (cloudy water) levels. During a boil water advisory all water for consumption must be brought to a rolling boil for a minimum of one full minute.

It is essential that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle, on a stove or an electric kettle without an automatic shut-off. The boil water advisory is only for the uses listed above.
