

Topic:

Charitable Donors, 2018

Released by Statistics Canada—February 14, 2020

Background:

In Nunavut, **1,370** taxfilers made a charitable donation in the 2018 tax year, a **decrease of 5.5%** from 2017. The total amount of charitable donations was around **\$3.0 million, down 3.7%** from the previous year. Nunavut donors accounted for **6.4%** of all taxfilers in the territory. Donors reported a median charitable donation of **\$540** - highest among the provinces and territories.

Details:

Charitable Donations						
	2018	2017 to 2018	2018	2017 to 2018	2018	2018
	Taxfilers Who Donated		Taxfiler Donations			Taxfilers Claiming Donation
	Number	% Change	\$ Thousands	% Change	Median in \$	%
Nunavut	1,370	-5.5	2,960	-3.7	540	6.4
Canada	5,324,280	-0.4	9,952,505	3.9	310	19.4

Yukon	4,340	-3.6	7,155	2.0	450	15.6
Northwest Territories	3,560	-3.5	5,985	-3.5	450	11.8

Notes:

1. Canadians contribute in many ways to charitable organizations. These data include only amounts given to charities and approved organizations for which official tax receipts were provided and claimed on tax returns. To verify if a charity is registered under the Income Tax Act, tax filers can consult the Charity Listings available from the Canada Revenue Agency webpage. It is possible to carry donations forward for up to five years after the year in which they were made. Therefore, donations reported for the 2018 taxation year could include donations that were made in any of the five previous years. According to tax laws, tax filers are permitted to claim both their donations, and those made by their spouses to receive better tax benefits. Consequently, the number of people who made charitable donations is higher than the number who claimed tax credits.
2. All data in this release have been tabulated according to the 2016 Standard Geographical Classification used for the 2016 Census.

Note to Readers:

The percentage figures for Nunavut reflect the relatively small number of donors and small amount of donations. Over a number of years, the resulting changes would be a better indication of actual changes in either donors or donations.
