Genealogical Table

The Greenland names are taken from Inuterssuaq Uvdloriaq, with the exception of a few taken from Peary, Rasmussen, etc. and indicated by an asterisk. A comment by Cook (1911: page 55) shows that Manik is the same person as Aloqissaq, daughter of lttukusuk and lvalo. The Canadian names are included only to the 5th or 6th generation, so as to maintain simplicity.
