

# Syphilis is Treatable

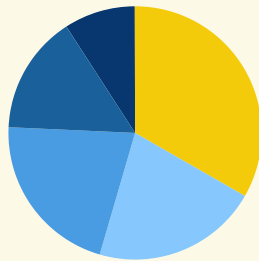

And it is on the rise in Nunavut

There were a total of 118 infections in 2023

Men and women were equally at risk

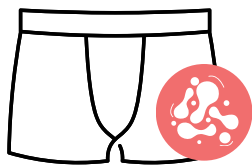

Most people infected were between 30-39 years old

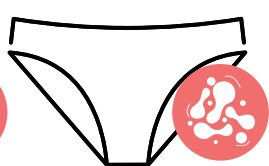

- 30-39
- 25-29
- 20-24
- 40-59
- other

**Get tested, to clear any doubts.**

Symptoms do not always show but they can appear as:

painless penile sores

painless vaginal sores

painless oral sores

**Syphilis in Pregnancy**

Untreated syphilis can cause serious damage to our bodies and unborn babies

Syphilis can co-exist with other sexually transmitted infections.
