This employment opportunity is open to all applicants.

The Government of Nunavut (GN) was selected as one of Canada's Best Diversity Employers, Top Employers for Young People and recent graduates in 2022. With one of the fastest growing and youngest populations in Canada, Nunavut is a dynamic, vibrant territory, committed to becoming an even better place for future generations. As a government, we are strengthening our unique model of governance - one that integrates Inuit societal values, promotes use of the Inuktitut language, achieves a representative public service, and collaborates with partners to achieve the promise of Nunavut. Successful applicants will enjoy a competitive salary, medical and dental benefits, a defined benefit pension plan, relocation privileges and opportunities for training and career advancement.

Reporting to the Regional Project Manager, the Project Manager is accountable for the application of the GN Project Management Policy and CGS Project Management Process to consistently deliver large projects of up to or more than \$100 million or a portfolio of large and smaller projects across various areas described below with varying complexity.

The position requires the incumbent to manage the delivery of the assigned portfolio working with GN functional disciplinary support for QA, and contractor's and consultants for engineering and construction. The Project Manager is ultimately accountable for the delivery of the project(s) within the prescribed KPI's and adherence to the GN Project Management procedures and practices. Management of funding and forecasting carryovers and cashflows are critical parameters of the environment. Working alongside the GN Planning as well as Operations & Maintenance Departments, securing their buy in at the correct phase of the project life cycle and ensuring the quality of estimates produced to support funding requests.

A critical dimension of the position is hands on field construction experience, a minimum of two years' experience is required with a delivery in the following areas as examples: Effectively monitoring and challenging contractor's staff on construction sequencing, optimal methodologies for reduced safety exposure and schedule security, early identification of construction risks, gauging the adequacy of schedule resource loadings, conducting constructability and safety walk throughs. A proven track record of project delivery (all phases from initiation to construction, commissioning, and handover) is preferred over knowledge of the PMBOK that is limited to theory.

The knowledge, skills, and abilities required for this job are usually obtained through a recognized Degree in a relevant discipline, an engineering degree would be an asset, a minimum three (3) years of progressively challenging project management experience in either one or a combination of the following segments of industry:

- Linear infrastructure (water & sewer)
- Water Treatment Plants
- Sewage Treatment Plants
- Commercial Buildings having a covered area of more than six thousand square meters or more.
