

Public Health Advisory

Boil Water Advisory – Kugluktuk

June 8, 2021

Kugluktuk, Nunavut

The Department of Health is issuing a boil water advisory for the Hamlet of Kugluktuk.

This is a precautionary measure due to high turbidity (cloudy water) levels. During a boil water advisory, all water for consumption must be brought to a rolling boil for a minimum of one full minute.

It is essential that all water be boiled for the following uses:

- Drinking.
- Preparing infant formulas.
- Preparing juices and ice cubes.
- Washing fruits and vegetables.
- Cooking.
- Brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

It is not necessary to boil water used for anything other than the above list. Updates will be provided to the community when available.
